

Glendale Traffic Census 2017

Due to continuing concerns over the increased volume of traffic along the B884 (Glendale Road) Glendale Community Council undertook 2 traffic counts of vehicles entering and leaving Skinidin at the start of Glendale. The days were chosen when enough volunteers were available – 2 each for a 2 hour time slot, recording vehicle type, numbers and approximate number of passengers and unfortunately both happened to be wet and windy, with torrential rain and poor visibility on the second day. We believed that this would have had a marked impact on the number of people wanting to visit Glendale and Neist Point in particular on these days.

Date	Total Vehicles In/Out	Total Approx. Passengers	Local vehicles (Passengers)	Non Local Vehicles (Passengers)
Friday 28 July	1160	2547	173 (217)	987 (2330)
Wednesday 16 August	1320	2639	220 (266)	1100 (2373)
Total	2480	5186	393 (483)	2087 (4703)

Using these figures as a basis, we have made some annual predictions for the volume of **non-local** traffic using the B884 to go in and out of Glendale.

	Vehicles	People
2 days (From Census)	2087	4703
One week	7304	16460
30 weeks – High Season	219120	493815
10 weeks (80%) Mid Season	58432	131680
12 weeks (20%) Low Season	17529	39504
Total	295081	664999
